DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 20, 21, 29 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Bluhm.

Bluhm discloses a disk brake comprising a brake pad having a lining support (3) and a friction lining (1), at least one stud being mounted on the lining support for fixing the friction lining, wherein the stud passes though the fixing lining at least from approximately the middle thereof up to the lining surface.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 22 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bluhm in view of Biswas.

Application/Control Number: 10/537,365 Page 3

Art Unit: 3683

Re claim 22, Bluhm does not teach wherein the stud is welded onto the lining support. Biswas teaches wherein a stud (22) is welded onto a lining support (16). It would have been obvious to one of ordinary skill in the art at the time the invention was made to weld the stud to the lining support since welding is a well known means for connecting.

Re claim 28, Bluhm does not teach an underlayer provided between the lining support and the friction lining. Biswas teaches an underlayer (18, 20) provided between the lining support and the friction lining. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide an underlayer between the lining support and the friction lining for damping purposes.

Allowable Subject Matter

- 5. Claims 31-38 are allowed.
- 6. Claims 23-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 10/537,365

Art Unit: 3683

Chase teaches a brake pad having a lining support and a friction lining, at least one stud being mounted on the lining support for fixing the friction lining, wherein the stud passes though the fixing lining at least from approximately the middle thereof up to the lining surface.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Torres whose telephone number is (571)272-7127. The examiner can normally be reached on Monday, 6:00 AM - 4:30 PM, Tuesday, 6:00 - 12:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan can be reached on (571)272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
